

# sensilis

## Sensitive Skin Lab

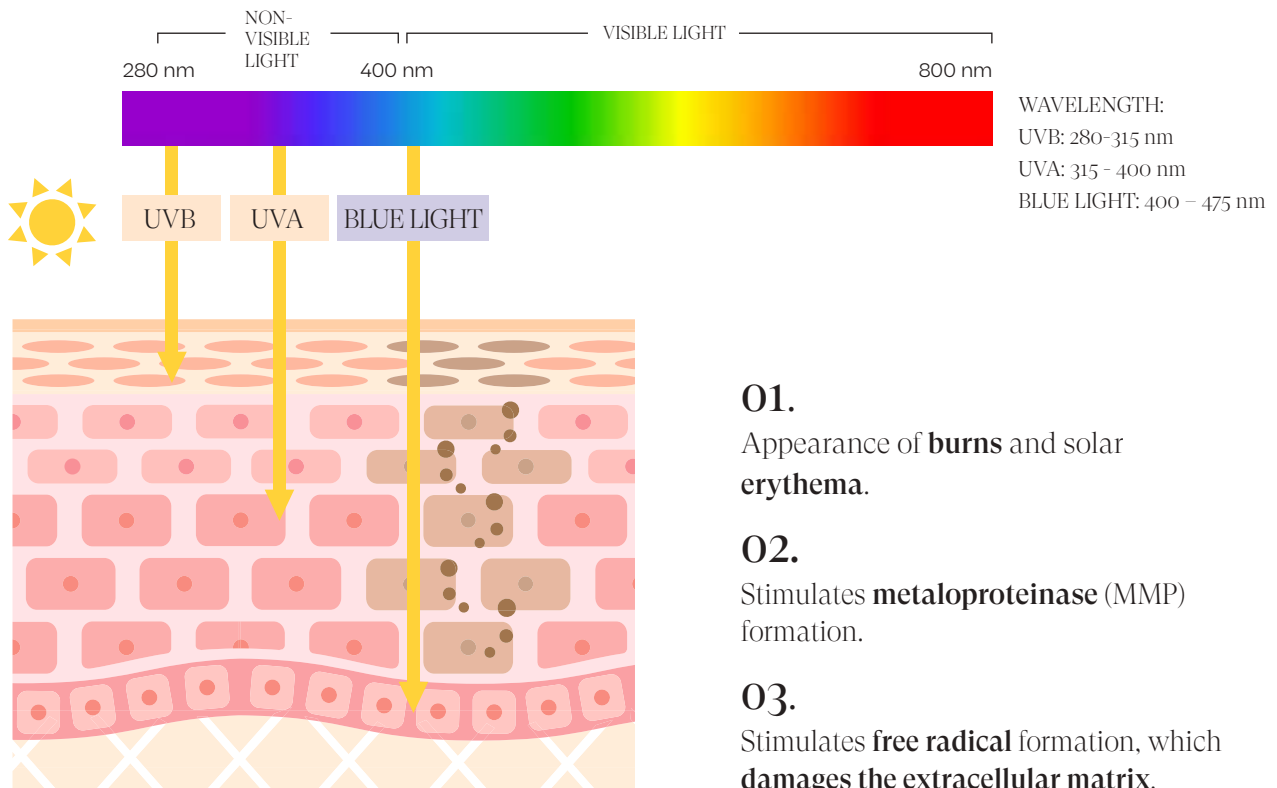

## Photocorrection

Provides the highest daily protection while correcting and repairing specific sensitive skin conditions.

Dermatologically tested on sensitive skin

# PHOTOAGING

*The main causes of skin ageing are UVA, UVB and blue light radiation*

## SPECIFIC SENSITIVE SKIN CONDITIONS

*Solar radiation has damaging effects on each skin type:*

**01.**

*Skin with redness*

- Alters skin barrier function
- Stimulates vasodilation
- Reduces firmness

**02.**

*Hyperpigmented skin*

- Stimulates melanocyte activation
- Increases melanin production
- Stimulates hyperpigmentation

**03.**

*Oily skin*

- Increases sebaceous gland activity
- Skin thickening
- Skin dehydration

**04.**

*Dehydrated skin*

- Decreased aquaporins
- Loss of brightness
- Premature aging and appearance of wrinkles
