Sensitive
Skin Lab

Pure Age Perfection

Corrects blemishes and wrinkles,
effective even on adult acne

Dermatologically tested on sensitive, oily and blemish-prone skin.

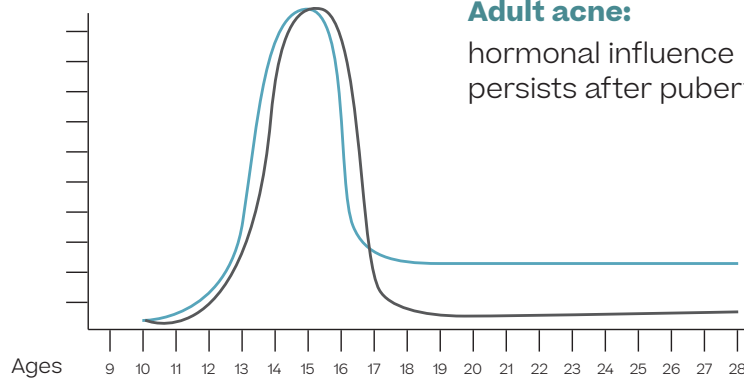

Material for healthcare professionals

ADULT ACNE

01_MAIN CAUSE

Hormonal influence: *androgens*

Androgen level
and acne development

- Higher hormone levels
- Increased sensitivity in the receptors

02_CONSEQUENCE

Sebaceous gland *hyperactivation*

03_PHYSIOPATHOLOGY

Overproduction of sebum + Hyper keratinization of the pilosebaceous unit

CELL INACTIVATION

Decreased synthesis of collagen
and elastin fibers.

ACNE

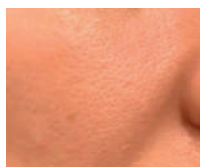

Most common dermatological pathology. **40% of adults** aged 25 years and older suffer from it.

IMPERFECTIONS

AGING OILY SKIN
